**ACM (the Association for Computing Machinery) delivers resources that advance computing as a science and a profession.**

**ACM is the world's largest professional, educational, and scientific computing society with over 108,000 members worldwide across every spectrum including educators, researchers, and industry professionals.** ACM strengthens the computing profession's collective voice through strong leadership, promotion of the highest standards, and recognition of technical excellence. ACM provides the computing field's premier Digital Library and serves its members and the computing profession with leading-edge publications, conferences, and career resources. ACM supports the professional growth of its members by providing opportunities for life-long learning, career development, and professional networking.

It is our goal to connect our members with the most valuable career opportunities while also connecting academic, government, and corporate employers with our unique audience of qualified candidates in the computing industry. ACM membership is drawn from all sectors of the computing sciences and their applications, from the design and construction of computers to the development of appropriate programming theory and languages and the utilization of computers in scientific investigation, industrial control, management data processing, and the humanities. **ACM's membership includes the IT industry's most respected leaders and decision makers, academics and practitioners, and has one of the most powerful audiences in the information technology space including CIOs, CTOs, and research scientists.**
